

# **VAUHTI**

**RESPONSIBLE FOR SPEED**

## **Vauhti, Responsible for Speed since 1912.**

Vauhti's story began over a century ago with pioneers who saw skiing not just as a sport, but as a challenge to push boundaries.

From the earliest tar waxes to today's advanced products, a relentless drive for performance has always guided every step of our journey. Collaboration with elite athletes, scientific research, and decades of innovation established Vauhti as a global leader in ski wax technology. Every product we create reflects our commitment to excellence.

Automated production and cutting-edge robotics ensure that our waxes deliver top-tier performance for skiers of all levels.

Even as we innovate, we remain mindful of the skiing experience for future generations. From responsible production processes to thoughtfully designed packaging, every choice is made to reduce our impact on the winter landscapes we cherish.

**Vauhti is more than a ski wax—it's a legacy of passion. More than a century later, our mission remains the same: lead with innovation, grow with care and inspire people to ski.**

# RACE

In a sport where victories are decided by the thinnest of margins, RACE waxes give skiers the advantage they need when conditions are at their toughest. Developed through relentless testing, top-tier ingredients, and decades of competitive skiing experience, RACE waxes deliver maximum glide, unbeatable durability, and proven results from training slopes to World Cup runs.

## TOP RACE VECTOR

When the maximum speed is not the only factor, but you want to maximize the velocity from start to finish, you need VECTOR coating to solve this.

The formula of TOP RACE VECTOR has been specially developed to be the best possible coating on tricky wet snow conditions.

30g

TRV3025  
**TOP RACE VECTOR**  
30g

Optimised for tricky wet snow conditions between +7°C and -3°C.

## TOP RACE LIQUID

Give yourself the edge with a top-level coating engineered for wet and humid snow. With outstanding glide and reliable performance, TOP RACE RED is ideal for cross-country, alpine, and snowboard racers. After preparing the ski base with a RACE series glide wax, shake the bottle thoroughly and spray evenly over the glide zone. Let dry, and your skis are ready for racing.

60ml

TRL6025  
**TOP RACE RED  
COATING SPRAY**  
60ml

## TOP RACE BLOCKS

TOP RACE BLOCKS is a premium top-coating wax crafted from high-quality raw materials. It provides smooth acceleration, lasting speed, and consistent performance even in the most demanding race conditions.

12g

TRB1225  
**TOP RACE RED  
BLOCK**  
12g

Optimised for wet and humid snow between +7°C and -3°C.

TVB1225  
**TOP RACE VIOLET  
BLOCK**  
12g

Designed for dirty, artificial snow in temperatures ranging from -1°C to -7°C.

TBB1225  
**TOP RACE BLUE  
BLOCK**  
12g

Ideal for cold conditions and old, dry snow from -5°C to -15°C.

TMOS2B1225  
**TOP RACE MOS2  
BLOCK**  
12g

An exceptionally hard, wear-resistant wax made for dirty and old artificial snow.

## RACE LIQUID GLIDE

Developed for racers who expect nothing less than excellence, the RACE LIQUID GLIDE series combines advanced formulation with precision craftsmanship to meet the highest demands of competitive skiing.

Made from a blend of premium hydrocarbons, zinc stearate, and silicone wax, RACE LIQUID GLIDE delivers exceptional glide and impressive durability from start to finish.

60ml | 100ml

RRL6025  
**RACE RED**  
60ml

RRL10025  
**RACE RED**  
100ml

Excels in wet conditions, offering reliable speed between +7°C and -3°C.

RPL6025  
**RACE PINK**  
60ml

RPL10025  
**RACE PINK**  
100ml

Perfect for fresh snow with temperatures around zero, from +3°C to -4°C.

RVL6025  
**RACE VIOLET**  
60ml

RVL10025  
**RACE VIOLET**  
100ml

For dirty artificial snow, delivering consistent results from -1°C to -7°C.

RBL6025  
**RACE BLUE**  
60ml

RBL10025  
**RACE BLUE**  
100ml

Made for artificial dry snow, ensuring smooth performance from -5°C to -15°C.

180g

## RACE LDR GLIDE WAXES

The RACE LDR series is developed for situations where durability and long-lasting glide are critical. Available in powder, solid and liquid forms, RACE LDR works as a base layer to enhance adhesion and longevity of the wax applied on top. It can also be used independently in variable snow and weather conditions.

RACE LDR BLACK contains molybdenum disulfide for enhanced durability and glide on dirty or worn snow

# GRIPWAXES

Classic skiing demands a perfect balance between grip and glide. Vauhti's history in grip wax began with traditional tar blends created for wooden skis and the demanding Nordic winters. Those pioneering formulas evolved into a line of modern high-performance products, engineered to meet the challenges of varied temperatures and changing track conditions. The result is a precise, dependable grip from start to finish.

## PURE RACE GRIP WAX OLD SNOW

Made for old, artificial, and coarse snow. Durable, viscous, and engineered with advanced additives for a fast, reliable kick every time.

45g

377-GPROSR  
**RACE RED**  
45g  
+3°C to -1°C

Ideal for wet, coarse snow - perfect top layer over klister.

377-GPROSS  
**RACE SILVER**  
45g  
+1°C to -4°C

Provides reliable performance on icy tracks and pairs seamlessly with PURE Race Blue Klister in rough snow conditions.

377-GPROSLDR  
**RACE LDR**  
45g  
0°C to -10°C

Versatile grip on old and artificial snow. Works well as a klister top layer or as a midlayer under harder waxes like Blue and Violet.

377-GPROSB  
**RACE BLUE**  
45g  
-5°C to -20°C

Designed for dry, old, and artificial snow - a sliding grip wax engineered for the demands of modern ski racing.

## PURE RACE GRIP WAX NEW SNOW

Engineered for fresh, natural, fine snow, Pure Race New Snow gives skiers a confident kick and effortless glide. Advanced additives elevate performance beyond traditional synthetic waxes, so every stride feels smooth and precise.

45g

377-GPRNSW  
**RACE WHITE**  
45g  
+3°C to -3°C

Designed for wet fine snow. Maintains dependable grip and performance on tracks prone to icing.

377-GPRNSP  
**RACE PINK**  
45g  
-1°C to -5°C

Ideal for dry, fine snow. Works perfectly as a klister coating, providing a smooth, reliable grip.

377-GPRNSV  
**RACE VIOLET**  
45g  
-2°C to -7°C

Offers a consistent grip across a wide range of normal winter conditions, especially on shiny, fine-grained new snow.

377-GPRNSG  
**RACE GREEN**  
45g  
-5°C to -20°C

For cold, natural snow. Strong grip even in the harshest winter conditions.

## GS GRIP WAX

Designed for all snow types, especially old and artificial tracks. GS waxes are easy to apply, long-lasting and offer a reliable grip for racers and recreational skiers alike.

45g

357-GSR  
**GS RED**  
45g  
+1°C to -2°C

Ideal for wet snow around zero degrees. Works perfectly as a top layer over GS CARROT in warmer conditions for optimal grip and performance.

357-GSC  
**GS CARROT**  
45g  
-1°C to -6°C

A versatile grip wax that performs across a wide range of conditions.

357-GSB  
**GS BLUE**  
45g  
-5°C to -15°C

Ideal for cold snow, either as a standalone grip wax or layered over GS CARROT below -8°C

357-GSG  
**GS GREEN**  
45g  
-10°C to -30°C

Perfect as a top layer over GS CARROT or BLUE in extreme cold, providing smooth glide while the underlying grip wax ensures a strong, reliable kick.

## GS BASE WAX

Formulated to create a solid, durable foundation that locks in overlaying grip waxes, ensuring consistent performance and maximum longevity on every run.

45g

357-GSBA  
**GS BASE AT**  
45g

For coarse and abrasive snow as well as new or artificial snow in damp conditions.

357-GSBAS  
**GS BASE SUPER**  
45g

Perfect base wax for new and dry snow.

## GT TAR GRIP WAX

The GT series is engineered for natural and fine-grained snow. Traditional tar compounds provide versatile performance and easy waxing, making them ideal for both competitive and everyday skiing.

45g

367-GTR  
**GT RED**  
45g  
+1°C to -1°C

For new snow conditions near zero. Can also be used on older or heavily skied trails down to -3°C.

367-GTP  
**GT PINK**  
45g  
0°C to -4°C

Ideal for new snow and perfect as a top layer over klusters in mixed conditions.

367-GTC  
**GT CARROT**  
45g  
-1°C to -6°C

A versatile favourite for mild temperatures. Easy to apply, highly durable, and performs exceptionally well on firm, older snow.

367-GTB  
**GT BLUE**  
45g  
-3°C to -10°C

For natural snow in cold conditions.

367-GTG  
**GT GREEN**  
45g  
-6°C to -20°C

All-purpose grip wax for all types of snow in freezing conditions.

## PURE RACE KLISTER

When tracks turn sticky, icy, or wet and conditions are at their toughest, klister step in. RACE klister provides a strong, reliable grip, giving skiers the confidence to tackle any challenge.

60g

385-KPRR  
**RACE RED**  
60g  
+10°C to +1°C

Designed for extremely wet snow conditions. Can be used as a top layer or mixed with LDR klister. Also effective on mixed snow where there is a risk of icing.

385-KPRLDR  
**RACE LDR**  
60g  
+5°C to -10°C

A versatile klister ideal for icy tracks and fresh snow. Use as a top layer or mix with other klister for durable grip and smooth glide.

385-KPRV  
**RACE VIOLET**  
60g  
+2°C to -6°C

A hard, durable klister for old, hard, and shiny snow. Works well as a middle layer with other klister or alone on firm, shiny tracks.

385-KPRB  
**RACE BLUE**  
60g  
-1°C to -15°C

For icy and old snow. Ideal for refrozen, hard, or artificial tracks. Can be used as a base layer for other grip waxes and klister.

## KS KLISTER

Engineered for snow that tests your limits, KS Klister provides reliable grip on wet, icy, and coarse tracks, helping skiers maintain control with every kick.

60g

375-KSBA  
**KS BASE**  
60g

Ensures excellent adhesion and long-lasting durability for top-layer klister and grip waxes.

375-KSR  
**KS RED**  
60g

+10°C to +2°C

Great for wet conditions when the snow is fresh or slightly coarse.

375-KSV  
**KS VIOLET**  
60g

+1°C to -10°C

For wet, challenging conditions around freezing temperatures.

375-KSB  
**KS BLUE**  
60g

+0°C to -15°C

Perfect for icy snow. Also serves as a base layer for grip waxes on hard, icy tracks.

375-KSU  
**KS UNIVERSAL**  
60g

+4°C to -7°C

For coarse snow and rough, variable weather.

## GS LIQUID GRIP

Take control of every stride with GS Liquid Grip. A simple, tool-free application that creates consistent, long-lasting layers. Apply, let dry, and your skis are ready for the tracks.

80ml

341-LGSBAS  
**GS BASE SUPER**  
80ml

An all-weather base liquid grip wax, perfect for enhancing the durability of overlaying grip waxes

341-LGSV  
**GS VIOLET**  
80ml  
1°C to -7°C

Ideal for new, fine-grained natural snow in milder winter conditions

341-LGSC  
**GS CARROT**  
80ml  
-2°C TO -20°C

Perfect cold-weather liquid grip wax, especially on old and rough snow.

## KS LIQUID KLISTER

Grip with confidence. KS Liquid Klister provides consistent, long-lasting adhesion on challenging snow conditions. Easy to apply and ready in moments, it keeps your skis performing at their best when it matters most.

80ml

341-LKSBA  
**KS BASE**  
80ml

Provides a durable foundation for top-layer grip waxes and klister.

341-LKSU  
**KS UNIVERSAL**  
80ml  
+10°C to -1°C

A versatile liquid klister designed for a wide range of conditions, from wet snow to humid near-zero temperatures.

## THE STORY BEHIND

In skiing every detail matters! It's more than just speed. That's why I have partnered with Vauhti.

Together with my brother Ola who brought his creative vision to the design we created a product that truly represents who I am.

It isn't just a ski wax, it's a reflection of our love for skiing.

Designed by us, trusted by me.

**Johannes Klæbo**

## KLAEBO SPEED PRO LIQUID GLIDE WAXES

With high-quality ingredients and fluorocarbon-free additives, the SPEED PRO series is made to take on all snow and weather conditions. Unleash your full skiing potential thanks to excellent durability and performance. These waxes are specially designed for active and competitive skiers, perfect for both training sessions and racing.

100ml

KCSPWL100  
**SPEED PRO WARM**  
100ml

Best suited for wet snow conditions between +7°C and -3°C

KCSPCL100  
**SPEED PRO COLD**  
100ml

Appropriate for dry and cold snow in temperatures between -2°C and -20°C

KCSPUL100  
**SPEED PRO UNIVERSAL**  
100ml

Designed for a wide variety of situations with a range of +5°C to -10°C

## KLAEBO SPEED LIQUID GLIDE WAXES

Discover your inner Speed King with the new Speed liquid glide wax series! Made from high-quality hydrocarbon ingredients, these waxes are quick and easy to apply with guaranteed performance in all weather conditions. Perfect for recreational enthusiasts and active skiers, they are also ideal for base preparation and racing maintenance.

100ml

KCSWL100  
**SPEED WARM**  
100ml

Best suited for wet snow conditions between +7°C and -3°C

KCSCL100

## KLÆBO SPEED GLIDE WAXES

With Speed Glide waxes and their high-quality hydrocarbon ingredients, get your skis ready to conquer the tracks. Suitable for skiers of all levels, from beginners to professional racers, these waxes not only provide reliable performance in all weather conditions but can also be used for effective ski maintenance.

60g

## KLÆBO MAINTENANCE & CARE

New wax should always be applied to a clean ski base. That's why we've developed easy-to-use cleaning and maintenance products for every need. From skin ski care products to grip wax removers, keep your skis in top shape and ready for every adventure.

80 / 100ml

KCCG100  
**CLEAN & GLIDE**  
100ml

Maintain your skis like a pro with CLEAN & GLIDE, a product specially designed to effectively clean the glide zone and protect the ski base with a dirt-resistant coating.

KCSCLEAN80  
**SKIN SKI CLEANER**  
80ml

Created specifically for skin strip cleaning, its unique composition effectively removes dirt and other impurities.

KCSCARE80  
**SKIN SKI CARE**  
80ml

SKIN SKI CARE is a special liquid care product designed to keep the skin strips of skin skis performing at their best. SKIN SKI CARE prevents dirt and ice build-up, guaranteeing better grip and glide with every use.

KCGR100  
**GRIP REMOVER**  
100ml

Speed Grip Remover is specifically designed to give classic skis the best care. It effortlessly removes old grip wax and cleans the grip zone.

KCBC100  
**BASE CLEANER**  
100ml

Speed Base Cleaner thoroughly cleans the ski base, removing all traces of oil and dirt from the bottom and sides of the skis.

KCSGP45  
**SPEED GRIP PINK**  
45g

In normal winter conditions, Speed Grip Pink is the wax you need. This versatile wax performs exceptionally well on fine-grained and fresh snow, especially when the temperature ranges from -2°C to -7°C.

KCSGB45  
**SPEED GRIP BLUE**  
45g

Speed Grip Blue is the ideal wax on a cold winter day. With an optimal temperature range of -5°C to -20°C, its excellent grip capabilities aren't the only standout feature. The amazing glide properties also make it perfect for racing.

KCSGU45  
**SPEED GRIP UNIVERSAL**  
45g

Speed Grip Universal is perfect for old, artificial or coarse snow. This durable wax delivers optimal grip and durability. It works best in temperatures ranging from 0°C to -10°C and also serves as an excellent mid-layer wax for Speed Grip Pink and Blue.

KCSGBA45  
**SPEED GRIP BASE**  
45g

If you are looking to get the best durability out of your grip wax, try out the Speed Grip Base wax. With its excellent binding properties, it is designed to increase the performance of any overlaying grip wax.

## KLAEBO SPEED GRIP WAXES

For those wanting the best for their classic skis, check out the SPEED GRIP collection to find the perfect grip wax suitable for both racing and recreational use.

45g

## KLAEBO SPEED KLISTER

Don't let wet or icy snow stand in the way of a successful skiing trip. SPEED KLISTER will provide the grip you need, even in the most challenging conditions.

80 / 100ml

KCSKP60  
**SPEED KLISTER PINK**  
60g

This hard, durable klister performs best on old and coarse snow with temperatures ranging between +2°C to -7°C. Its strong grip capabilities make Speed Klister Pink an ideal choice if the tracks are hard and shiny. In variable conditions, it is an excellent mid-layer for other klister.

KCSKU60  
**SPEED KLISTER UNIVERSAL**  
60g

If the tracks are icy or the snow is wet, Speed Klister Universal is the perfect choice. This product is well suited for wet and icy conditions from +5°C to -10°C. This well-rounded klister provides excellent grip and glide properties, works well as a topcoat, and can also be mixed with other klister.

KCSKBA60  
**SPEED KLISTER BASE**  
60g

Apply a base layer of Speed Klister Base to increase the durability and performance of overlaying klister, especially on wet, icy or coarse snow.

KCGKIT

## KLÆBO COLLECTION KITS

Everything a true Speed King needs in one handy kit. Each set includes carefully selected products for cleaning, waxing, and protecting your skis, making maintenance quick and effortless.

## KLAEBO COLLECTION TOOLS

Make the most of every skiing trip with gear designed for excellence. The Klæbo collection tools and accessories are designed to maximise performance, ensure safety and deliver the best comfort and control..

KCNBS  
**NYLON BRUSH  
SMALL**

KCNBL  
**NYLON BRUSH  
LARGE**

Clears excess wax and polishes your base for ultimate speed on the snow.

KCPC20  
**POLISHING CLOTH 20M**

Buffers the ski base for an even, fast glide across any track.

KCSC  
**SYNTHETIC CORK**

Levels wax and klistler layers perfectly for flawless, controlled kicks.

KCSAS  
**ACRYLIC SCRAPER 3mm**

Removes wax cleanly, leaving your skis primed for maximum glide.

KCSH  
**SKI HOLDER**

Secures skis between sessions, always ready to hit the track.

KCTHERMO  
**THERMO DRINK BELT**

Keeps drinks at the perfect temperature while staying on the move.

KCTB  
**TRAVEL BAG 65L**

For transporting your equipment in style.

KCBPL  
**BACKPACK LARGE**

Spacious design for all your essentials.

KCBELT  
**DRINK BELT WITH BOTTLE**

Hydration and essentials within easy reach on every run.

KCWA  
**WAX APRON**

Protects your clothes while waxing like a pro.

KCSBAG  
**SKI BAG 3 PAIRS**

Protects skis in transit, keeping them race-ready at all times.

KLÆBB

An aerial photograph of a snowy ski slope. Several skiers are visible, some standing and some in motion. The snow is marked with numerous ski tracks. The text 'CARE MAINTENANCE SERIES' is overlaid in the center of the image. The word 'CARE' is in a large, bold, italicized font, and 'MAINTENANCE SERIES' is in a smaller, bold, sans-serif font below it.

# **CARE**

## **MAINTENANCE SERIES**

**Don't let your skis miss out on the care they deserve. Elevate your skiing experience with our Maintenance Series, a comprehensive toolkit that empowers you to maintain your gear like a pro. Discover the difference proper maintenance can make and prepare your skis for every adventure that lies ahead.**

## CLEAN & GLIDE

CLEAN & GLIDE keeps your skis in top condition by removing dirt and old wax, leaving behind a smooth, protective coating that repels grime and maintains optimal glide. Begin every waxing session with CLEAN & GLIDE - because only a clean, well-prepared base unlocks the full speed and performance of your glide wax.

## BASE WAX & ALPINE BASE WAX

Base waxes are perfect for new or stone-ground skis and occasional seasonal touch-ups. They protect the glide zone without any heat treatment. Made from high-quality polyethylene, base waxes create a hard, dirt and water-repellent layer that keeps your skis performing at their best. With formulas adapted for both cross-country and alpine skis, they work seamlessly under any weather-appropriate liquid or solid glide wax.

**TOOL SERIES**

**Elevate your skiing journey with professional ski equipment tools that maximise performance, ensure safety, and deliver comfort and control like never before. Master the art of ski maintenance with gear designed for excellence.**

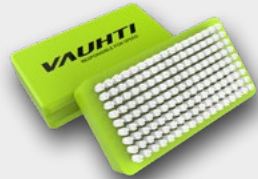

## BRUSHES

Become a waxing pro with our professional brush range – designed to clean and prepare your ski base for a smooth, fast glide.

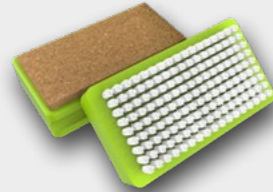

115-01010  
**NYLON BRUSH  
SMALL**

A reliable, all-purpose brush for removing excess wax and polishing the base. Often used as the final step in your waxing routine.

115-01020  
**NYLON BRUSH  
LARGE**

115-01015  
**NYLON BRUSH  
WITH NATURAL CORK**

A versatile 2-in-1 tool. The cork side levels and evens out wax layers, ready to be brushed out by the nylon side.

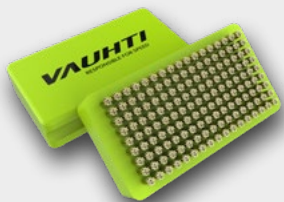

115-01025  
**NYLON FINISHING  
BRUSH**

A soft brush for the final polish that enhances base smoothness and brings out a natural high-gloss shine.

115-01040  
**POWDER  
BRUSH**

Designed for fine powder waxes, it ensures an even finish and flawless glide on race days.

115-01050  
**BRASS  
BRUSH**

Used for the first brushing of glide wax. Gently removes wax residue and opens the base structure for maximum absorption.

115-01060  
**STEEL  
BRUSH**

For deep cleaning and base preparation. Effectively opens the base structure before waxing to ensure optimal wax penetration and long-lasting performance.

## ROTO BRUSHES AND HANDLES

Achieve professional-level waxing results in a fraction of the time. Roto brushes deliver fast, consistent finishes, making them an essential choice for efficient base preparation and polishing.

115-01070  
**ROTO NYLON BRUSH**

A general-purpose brush ideal for removing excess wax and polishing the base to a smooth finish.

115-01077  
**ROTO NYLON  
140MM**

A larger version of the Roto Nylon brush

115-01071  
**ROTO NATURAL CORK**

Perfect for activating glide waxes without a waxing iron, leaving the surface sleek and ready to glide.

115-01072  
**ROTO POWDER BRUSH**

Designed for applying and brushing powder waxes. Ensures an even distribution and flawless glide, especially in racing conditions.

115-01074  
**ROTO FLEECE**

Ideal for spreading and polishing liquid glide waxes, producing a uniform, high-quality finish across the base.

115-01075  
**ROTO NYLON/HORSE HAIR  
140MM**

A two-step brush that combines the cleaning power of horsehair with the finishing polish of nylon.

115-01074  
**ROTO STEEL/HORSE HAIR  
140MM**

Combines the deep-cleaning power of steel with the polishing precision of horsehair.

115-01703  
**ROTO HANDLE  
100MM**

115-01707  
**ROTO HANDLE COMBI  
140mm**

115-01704  
**ROTO HANDLE COMBI  
200mm**

## ALPINE BRUSHES

Each brush has a specific role in cleaning, opening the structure, and polishing the base for optimal glide.

2000-ABN  
**ALPINE OVAL BRUSH, NYLON**

Finish with the nylon brush for a polished, high-gloss surface and optimal glide.

2000-ABM  
**ALPINE OVAL BRUSH, METAL**

Used first to remove excess wax and open the base structure, ensuring new wax is absorbed efficiently.

2000-ABHH  
**ALPINE OVAL BRUSH, HORSE HAIR**

For smoothing the base and refining the glide after the metal brush.

## SCRAPERS

Scrapers remove excess wax after application, creating a smooth, even base for optimal glide and a flawless finish on skis or snowboards.

100-630  
**PLEXI SHARP (WAX SCRAPER SHARPENER)**

Keeps your scrapers sharp for perfect results every time.

100-00870  
**GROOVE SCRAPER**

Specially designed to remove wax from ski and snowboard base grooves.

100-00810  
**ACRYL SCRAPER  
3 MM**

100-00820  
**ACRYL SCRAPER  
5 MM**

100-00830  
**ACRYL DESIGNED  
5MM**

100-00840  
**SCRAPER  
SNOWBOARD**

Durable, easy-to-handle tools for removing excess wax from skis and snowboards. Available in various thicknesses and designs.

## NORDIC SHARP

Used before waxing, this structuring tool creates micro-grooves that boost wax absorption and water dispersion, ensuring smoother glide and improved performance.

130-8001  
**NORDIC SHARP WITH  
W FINE ROLLER**

## CLOTHS | FIBERTEX

Polishing cloths refine the ski base after brushing, removing fine wax residues and leaving it perfectly prepared. Fibertex offer a slightly more abrasive finish, ideal for removing stubborn wax or lightly structuring the base to enhance water dispersion and overall glide. Together, they ensure your equipment is ready to perform at its best.

110-00950  
**FIBERTEX**

110-00980  
**POLISHING  
CLOTH 10M**

110-00960  
**POLISHING  
CLOTH 20M**

## WAX IRONS

Waxing irons melt and spread wax evenly across the base, ensuring deep absorption and a flawless glide every time.

119-V1400  
**WAX IRON ECONOMY**  
1000W

119-V500  
**WAX IRON PROFESSIONAL**  
500W
