

APPAREL WORKBOOK FALL/WINTER 26/27

DESIGNED FOR THE UNEXPECTED

/ EST.1976

HALTI

A close-up photograph of a red, quilted jacket. The jacket is the central focus, showing its texture and folds. In the center of the chest area, the word "HALTI" is printed in a bold, white, sans-serif font. The background is a plain, light color, possibly white or light grey, which makes the red jacket stand out. The lighting is soft, highlighting the contours of the quilted fabric.

HALTI

EST. 1976

FOREWORD

This season marks a special milestone in Halti's journey: our 50th anniversary. Since 1976, Halti has stood for Functional Finnish Design, shaped by our expertise in demanding weather conditions and the spirit of Finnish *sisu*. Over the decades, we have written countless stories together with sports and outdoor enthusiasts, athletes, and partners who trust our products.

This FW26/27 season, we are proud to share with you a strong collection, accompanied by the heritage that brought us here: stories from our history, unique activations, and special anniversary products that honor Halti's legacy. At the same time, our recent brand refresh has given us a clear direction. We are aiming for international growth and reaching new audiences, while staying true to what makes us Halti: quality, sustainability, and timeless design created to perform in any weather.

As you explore the FW26/27 workbook, you'll discover a collection that reflects both where we come from and where we are heading. Together, we continue to write the next chapter of Halti's story.

AKI KUUSILEHTO, CEO

CONCRETE ACTIONS FOR OUR ENVIRONMENT

In true down-to-earth Finnish realism, our approach to sustainability is humble but consistent. We focus on making a real difference as opposed to big public promises. Our commitment to increasing the use of recycled, renewable and traceable materials, PFAS-compliant technologies, and bio-based DWR treatments are just a few of the hundreds of actions we work on to build a 100% responsible company. We focus on timeless design, materials, circularity, environment and people. No one in our industry can act alone, which is why we actively collaborate with other operators to develop transparent lifecycle responsibility.

ENVIRONMENTAL RESPONSIBILITY

- We design and manufacture durable and timeless products with the design philosophy of considering the environmental effects of the whole product life cycle.
- We are a bluesign® system partner and demand that both our new and existing bluesign® subcontractors comply with the detailed bluesign® restricted substance list.
- Our products are made in compliance with the REACH regulations, which protect people and the environment from harmful chemicals.
- We only accept RDS down to avoid do the unethical treatment of animals such as forced feeding, the plucking of living birds, or mulesing method in wool production. We do not use real fur in our products.
- We use 3D design program, which optimizes the design process.
- Our DWR is PFAS-compliant.
- Our Head Office follows WWF Green Office environmental management system to which WWF Finland has awarded the Green Office label on in 2022.
- We support circularity through our Halti 2nd Round services, which include SECOND HAND buying and selling, REPAIR service, DONATE boxes available at Halti retail stores in Finland, and SAVED returned and restored products sold in one of Halti's brand stores in Finland.

CORPORATE SOCIAL RESPONSIBILITY

- Our products are made in socially and ethically acceptable conditions.
- We expect all business partners to follow the Amfori BSCI and BEPI Code of Conduct which are commitment documents for amfori members and their business partners to exercise human rights due diligence and environmental protection in their global supply chains in line with internationally recognized principles. All our clothing and shoe factories must undergo BSCI or equivalent audits in risk countries.
- As a member of amfori BSCI, we actively exert our influence to promote economically, socially and ecologically responsible operations and maintain our awareness of these issues.
- As a member of the EOG and SOG, we take part in sustainable development projects in our industry and obtain first- hand information about matters relevant to our sector.

OUR FUTURE AIM

Since 2010, sustainable development has been an important element of Halti's business strategy. A lot has been done already, but we are continuously improving our activities and will continue to aim high. These are our concrete targets in the near future:

- We have made a Science Based Targets commitment and our target is to halve our emissions by 2030 and reach Net Zero by 2050.
- We continue to increase the use of recycled materials in our products.
- We continue to increase the use of bluesign® approved materials in our products.
- We aim to use only recycled/recyclable or renewable packaging materials.

SUSTAINABILITY SYMBOLS

 responsible down	The product contains standardized responsible down (RDS) or recycled down.
 pfc free	The shell material has PFAS-compliant water repellency treatment.
 bluesign	The product contains certified bluesign® approved material.
 eco cotton	The product contains organic cotton.
 circular	The product is designed and manufactured by the principals of circular economy.
 recycled	The product contains certified recycled material.
 recyclable	The product is crafted from a single material for easier and more efficient recycling after it's lifetime.
 bio-based	The product contains partly bio-based material.
 renewable	The product is made from renewable materials.

Huomioi että neon värit eivät tulostu oikean sävyisinä. Neon värit on merkitty N-kirjaimella. On myös huomioitava, että neon-väriset vaatteet voivat haalistua sekä värjätä muita vaaleampia materiaaleja. M-kirjain tuotteen värikoodin lopussa tarkoittaa, että materiaali on meleerattu. Untuvavaatteissa untuvat voivat kuultaa läpi pääli- ja vuorikankaista.

Note that neon colours do not appear as bright as they should in the printout. Neon colours are marked with letter N. It should also be noted that neon-colours in clothing may fade and stain other lighter materials as well. The letter M at the end of the product's colour code means that the material is melange. In down clothing, the down may be visible through outer and lining fabrics.

SUSTAINABLE WARMTH IN THE COLDEST HUMID CONDITIONS

Technical and ecological paddings which are produced by high standards using recycled materials. Paddings are extremely light weight and they can maintain high heat ratio even when wet. As padding is water repellent and extremely breathable, it is suitable for really high activity, in cold and wet circumstances.

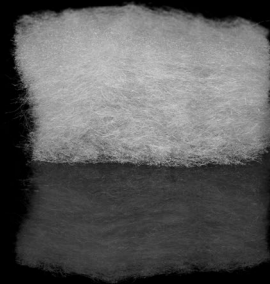

microtherm[®] THERMOFILL

This super soft down like filling contains small fiber clusters that are blowed into filling. This way fibers creates uneven structure that can capsule a lot of air inside and makes it very warm and lightweight.

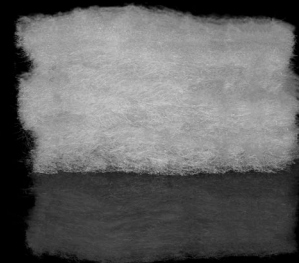

microtherm[®] ARCTY[®]

With extra fine and soft fibers this filling creates lofty feeling and super warm result. Many layers of fine fibers can capsule air very effectively and thus can be used in the coldest conditions.

microtherm[®] DYNAMIC

Enough warmth and technical functionality is key to this dynamic filling. Overlapping fibers creates stretchable structure that capsules air even with slim structure. Works perfectly with stretchable outshells.

059-2692 VARION W 2-IN-1 DX SKI JACKET

102

155

184

How to perform with style on pistes and after? Varion W 2-in-1 DX jacket comprises an athletic, technical ski jacket and a phat bodywarmer over the top. Either of them can be worn separately. On the most arctic ski days combination offers comfort and warmth. Functional PrimaLoft® insulated and fully taped 20K/20K DrymaxX® ski jacket fulfills all demands of the sporty ski enthusiasts for elevated performance. Hooded bodywarmer is a super piece for after-ski delivering extra coverage, pockets and of course chic style. Waist length vest looks great with dresses and sweaters, too.

Modern Recier M DX ski jacket is composed with recycled materials. All the fabrics are made of recycled materials including 20K/20K DrymaxX® membrane and insulation. Majority of trims and most of the zippers are made of recycled materials without compromising functionality. Jacket features athletic ski patterning, detachable hood, snow gaiter, inner cuffs, multiple pockets, practical zipper ventilations and much more. Streamlined design and great performance make this jacket an enduring ski partner for years to come.

SUSTAINABILITY KPI'S FOR

// ACTIVE SPORT CATEGORY

100%

Styles with minimum one sustainability KPI.

100%

Styles with partly bio-based materials.

BIO-BASED MATERIALS

BIO-BASED PLASTICS ARE MADE FROM A WIDE RANGE OF RENEWABLE BIO-BASED FEEDSTOCKS.

Bio-based textile fibers are made from renewable, and at least partly biological, materials. They offer an alternative to fossil-based materials and help reduce dependence on non-renewable resources. However, bio-based does not mean biodegradable, these materials should be recycled like any other synthetic textile. At Halti, we use bio-based materials sourced from three different origins.

Specifically crops grown for cellulose or starch-based polymers such as corn or sugar beet.

Biomass based waste products generally from the food, forest and farming industries that have valuable cellulose and starch extracted for polymer production.

Moving to resources that do not compete with food production (i.e. fungi, algae, bacteria), polymer sources do not require high energy nor, in the case of algae, additional food for growth.

In Halti's SS26 production, bio-based materials are used in the **Active Sport** and **Pallas Cool** collections, as well as in the **Stem 2 StepIn** sneakers. See the **Material** section of each product for details on the source.

086-0892 KALTIO W TRAINING HOODIE

G01

H63

H83

P99

Women's Kaltio hoodie is stylish and technical hoodie for intense training, running and other workout activities. Fit is a bit relaxed and enables maximum movement and range of motion. It is made of partly Bio-based Active dry knit material that provides ultimate comfort with good moisture-wicking. Bio-based part of the fabric is Sorona® fiber which is extracted totally from corn. The detailing features of jacket are zippered pocket at back, inner standup collar for extra comfort, and well-fitted hood that is sized to stay on your head during training and not forgetting the ponytail opening. Reflective details improve your visibility at nightfall. Decoration stitch at back is inspired by the shapes of fells in Lapland.

SIZE: 34 – 36 – 38 – 40 – 42 – 44 – 46

MATERIAL:

Active Dry Brushed Knit
42% Polyester / 40% Polyester (Biobased) / 18% Elastane

WEIGHT: 0.375 kg

FEATURES:

- Fixed hood
- Separate inner collar
- Ponytail opening in the hood
- Back pocket
- Slits at sides
- Reflective details
- Halti branding
- UPF 50+ value in fabric
- Sorona® certified fabric 1

086-0879 KALDU W TIGHTS

P99

Kaldu training tights are for adventurous women who enjoy workouts outdoors, on trails, stairs or in the sport park. These multipurpose tights are designed to work with gear belt, bike liners and shorts. Thanks to the well-fitted side -and the back pocket, you can carry your phone and some small belongings with you during training. Minimalistic look and super-comfortable, partly Bio-based material made with biomass enable the tights to be used in leisure time as well. Reflective details improve your visibility at nightfall.

SIZE: 34 – 36 – 38 – 40 – 42 – 44 – 46

MATERIAL:

Active Interlock Knit
72% Polyamide (Biobased) / 28% Elastane

WEIGHT: 0.233 kg

FEATURES:

- Elastic band at waist
- Cord adjustable waist
- Back pocket
- Thigh pocket

088-0257 LUMISTA W POLAR FLEECE JACKET

E01

G60

The Lumista polar fleece is a warm and windproof pile fleece jacket. It is an ideal cold-weather midlayer or the perfect outer layer for chilly shoulder season days. The bonded material has a textured teddy pile on the outer side and soft and warm fleece on inside. With a relaxed fit, protective collar, hem adjustment and zippered pockets this jacket is perfect for hiking trips, in the city or when relaxing at home after a day spent outdoors. This style is Monomaterial style excluding the trims. It means that the garment is easier to recycle back to raw material.

088-0258 LUMISTA M POLAR FLEECE JACKET

F24

U57

The Lumista polar fleece is a warm and windproof pile fleece jacket. It is an ideal cold-weather midlayer or the perfect outer layer for chilly shoulder season days. The bonded material has a textured teddy pile on the outer side and soft and warm fleece on inside. With a relaxed fit, protective collar, hem adjustment and zippered pockets this jacket is perfect for hiking trips, in the city or when relaxing at home after a day spent outdoors. This style is Monomaterial style excluding the trims. It means that the garment is easier to recycle back to raw material.

HALTI × untuvia

A Finnish innovation redefining down recycling.

Untuvia's patented technology, developed together with VTT Technical Research Centre of Finland, uses a supercritical CO₂ cleaning process to create a cleaner and more sustainable way to reuse natural down.

Gentle yet efficient

Down is cleaned without breaking feather spines.

Pure and hygienic

Free from dust, dirt, and impurities.

No yellowing

Prevents discoloration caused by traditional washing.

Circular by design

Extends the life of a valuable natural material.

Our impact

We create impact not only diverting textile waste from landfill and incineration. Untuvia's innovative process is more sustainable than the previous generation.

Water

Save up to 180L of water per each kg of recycled down produced.

Energy -efficiency

75% more energy efficient compared to legacy water-washing.

CO₂

40%+ CO₂ equivalent saving.

066-0031 HALTI1976 DOWN PARKA

P99

Halti 1976 down parka is designed and developed by respecting the original roots and design philosophy throughout our 50 years history. The new 1976 parka jackets highlights responsible material choices and design attributes. Repairability and longevity as focus this parka is made to last. This fully waterproof parka jacket is crafted with recycled outshell fabric, recycled membrane as well as recycled lining. To top it all of we are using innovative recycled Untuvia® down filling with fill power 700 to ensure the warmth.
