

APPAREL WORKBOOK SPRING/SUMMER 2026

DESIGNED FOR THE UNEXPECTED

EST./1976

HALTI

DESIGNED FOR THE UNEXPECTED SINCE 1976

FOREWORD

In 2026, Halti turns 50. Since 1976, we've equipped sports and outdoor enthusiasts with gear designed for the unexpected.

Our renewed brand identity continues to guide us. Finnish sisu sets us apart and drives us to grow globally. Everything we do is rooted in our strong values: acting responsibly, delivering high quality, and working together while leaving no one behind.

This Spring/Summer 2026 season, we introduce a collection built on purposeful design and premium functionality. From CE-certified UPF 90+ sun protection in Pallas Cool, to partly bio-based Active Sport gear, and new hemp-blend products in Kallio, we continue to evolve with sustainable, high-quality materials. We've also advanced our footwear collection with improved fit, comfort, and quality especially tailored for walking, along with innovations like step-in and barefoot designs.

Thank you for being part of our journey. Let's make SS26 a season of impact, honoring our roots with eyes firmly on the future.

AKI KUUSILEHTO, CEO

HALTI'S SUSTAINABLE DEVELOPMENT PROGRAMME

GEAR DESIGNED FOR PROTECTING THE ENVIRONMENT FROM THE PEOPLE.

In true down-to-earth Finnish realism, our approach to sustainability is humble but constant. We focus on making a real difference as opposed to big public promises. Our commitment to increasing the use of recycled, renewable and traceable materials, PFC-free technologies, and bio-based DWR treatments are just a few of the hundreds of actions we work on to build a 100% responsible company. We focus on timeless design, materials, circularity, environment and people. No one in our industry can act alone, which is why we actively collaborate with other operators to develop transparent lifecycle responsibility.

ENVIRONMENTAL RESPONSIBILITY

- We design and manufacture durable and timeless products with the design philosophy of considering the environmental effects of the whole product life cycle.
- We are a bluesign® system partner and demand that both our new and existing bluesign® subcontractors comply with the detailed bluesign® restricted substance list.
- Our products are made in compliance with the REACH regulations, which protect people and the environment from harmful chemicals.
- We only accept RDS down to avoid do the unethical treatment of animals such as forced feeding, the plucking of living birds, or mulesing method in wool production. We do not use real fur in our products.
- We use 3D design program, which optimizes the design process.
- Our DWR is PFAS-Free.
- Our Head Office follows WWF Green Office environmental management system to which WWF Finland has awarded the Green Office label on in 2022.
- In 2025 we launched **SAVED**, a concept for selling returned, and restored back to sales, products. **SAVED** is the latest addition to Halti 2nd Round circularity concept, which already includes repair service, buying and selling second-hand Halti gear, and donating used products to charity in our stores in Finland.

CORPORATE SOCIAL RESPONSIBILITY

- Our products are made in socially and ethically acceptable conditions.
- We expect all business partners to follow the Amfori BSCI and BEPI Code of Conduct which are commitment documents for amfori members and their business partners to exercise human rights due diligence and environmental protection in their global supply chains in line with internationally recognized principles. All our clothing and shoe factories must undergo BSCI or equivalent audits in risk countries.
- As a member of amfori BSCI, we actively exert our influence to promote economically, socially and ecologically responsible operations and maintain our awareness of these issues.
- As a member of the EOG and SOG, we take part in sustainable development projects in our industry and obtain first-hand information about matters relevant to our sector.

OUR FUTURE AIM

Since 2010, sustainable development has been an important element of Halti's business strategy. A lot has been done already, but we are continuously improving our activities and will continue to aim high. These are our concrete targets in the near future:

- We have made a Science Based Targets commitment and our target is to halve our emissions by 2030 and reach Net Zero by 2050
- We continue to increase the use of recycled materials in our products.
- We continue to increase the use of bluesign® approved materials in our products.
- We aim to use only recycled/recyclable or renewable packaging materials.

H87 FOG LILAC			

Huomioi että neon värit eivät tulostu oikean sävyisinä. Neon värit on merkitty N-kirjaimella. On myös huomioitava, että neon-väriset vaatteet voivat haalistua sekä värjätä muita vaaleampia materiaaleja. M-kirjain tuotteen värikoodin lopussa tarkoittaa, että materiaali on meleerattu. Untuva-vaatteissa untuvat voivat kuultaa läpi pääli- ja vuorikankaista.

Note that neon colours do not appear as bright as they should in the printout. Neon colours are marked with letter N. It should also be noted that neon-colours in clothing may fade and stain other lighter materials as well. The letter M at the end of the product's colour code means that the material is melange. In down clothing, the down may be visible through outer and lining fabrics.

EVO products were born as a result of evolution, when we set out to develop the popular Pallas styles to meet today's needs of the consumers. Pallas Evo hooded jacket has all needed details for day hiking or other active use in your daily life. Straight fit, sleek look with tonal color blockings makes style proper for street to trails. Jacket has light weather protection, good breathability and exceptional freedom of movement because of highly stretchable, partly recycled X-stretch material.

H33

H54

H62

H83

Pallas Cool stretch jacket is designed for day missions and diverse summer activities. It is built with lightweight stretch fabric, boosted with plant based DWR to shrug off a change in weather. Fabric is breathable, moisture wicking, quick drying and offers UPF 90+ protection. Jacket's side ventilations complete the cooling effect. Snug hood provides extra coverage from wind, insect bites and sun. Two roomy zipper pockets stash your essentials. Athletic fit and articulated patterning encourage a full range of motion. Material is partly biobased made from crop based polymers that comes from corn

SIZE: 34 – 36 – 38 – 40 – 42 – 44 – 46 – 48

G34

H24

H55

Taival jacket offers weather protection for those active and enthusiastic people who want to enjoy outdoor activities no matter the weather. Stretchable DrymaxX® Nano fabric with 3-layer construction and taped seams offer superb breathability, yet great protection against rain and wind. There are all needed functions for active training: ventilation at back, multiple pockets to carry your small belongings and fitted hood for extra protection. Lightweight knit shell fabric enables freedom of movement and packability. Reflective prints improve visibility in the dark. The water repellent treatment on the surface of the fabric is 42% plant based by Rudolf Bio-Logic and it's fluorocarbon (PFC) free.

T-SHIRT GRAPHICS

OUR SS26 T-SHIRT GRAPHICS CELEBRATE HALTI'S ROOTS AND THE SPIRIT OF FINLAND.

Created by our in-house design team, each print draws from our history and iconic Finnish elements—saunas, skis, reindeer, and the raw beauty of northern nature. These graphics are homegrown expressions of the places and values that define who we are.

SUSTAINABILITY KPI'S FOR

// ACTIVE SPORT

100%

Styles with minimum one sustainability KPI.

100%

Styles with partly bio-based materials.

BIO-BASED MATERIALS

BIO-BASED PLASTICS ARE MADE FROM A WIDE RANGE OF RENEWABLE BIO-BASED FEEDSTOCKS.

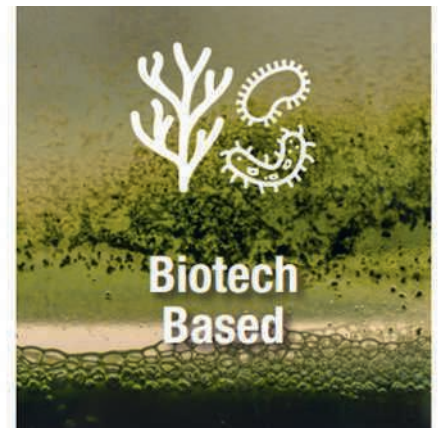

Bio-based textile fibers are made from renewable, and at least partly biological, materials. They offer an alternative to fossil-based materials and help reduce dependence on non-renewable resources. However, bio-based does not mean biodegradable, these materials should be recycled like any other synthetic textile. At Halti, we use bio-based materials sourced from three different origins.

Specifically crops grown for cellulose or starch-based polymers such as corn or sugar beet.

Biomass based waste products generally from the food, forest and farming industries that have valuable cellulose and starch extracted for polymer production.

Moving to resources that do not compete with food production (i.e. fungi, algae, bacteria), polymer sources do not require high energy nor, in the case of algae, additional food for growth.

In Halti's SS26 production, bio-based materials are used in the **Active Sport** and **Pallas Cool** collections, as well as in the **Stem 2 StepIn** sneakers. See the **Material** section of each product for details on the source.

086-0878 LUOSTO W TRAINING JACKET

H63

H83

P99

Never know when the weather changes quickly from windy to rainy or sunny. This jacket keeps you covered enough to be able to finish your workout session. Windproof, lightweight and breathable jacket without membrane packs down small, so it's easy to take with you. The jacket's 100% Bio-based fabric is made with straw and finished with plant based DWR treatment. Protective hood, ventilations at back, zippered chest pocket and adjustments makes this jacket the perfect choice for intense training, running and other workout activities.

088-0245 ULTRAMOVE W HOODED JACKET

E01

E63

F53

H87

P99

The Ultramove hooded jacket is a light and super breathable mesh layer. It is made with a very comfortable, yet highly technical plush mesh fabric that provides incredible breathability. It is soft against skin and when worn underneath a shell jacket it builds a high layer of warm air that provides exceptional insulation and warmth. This style is Monomaterial style excluding the elastic bindings. Monomaterial refers to a product composed of a single material or fibre. Monomaterial design means that the garment is easier to recycle back to raw material. In other words, choosing monomaterial makes the recycling process more efficient resulting in premium quality recycled yarn – and therefore reduces the use of virgin materials.

MATERIAL:
Thermal mesh 150gr
100% Polyester (Recycled)

WEIGHT: 0.261 kg

ACTIVE DRY

FEATURES:

- Fixed hood
- Zippered front
- Zippered hand pockets
- Long sleeves
- Cord adjustable hem
- Halti branding

BIONIC-FINISH® ECO

Elevating Performance

Revolutionizing Water Repellency

Brand Synergy

In the midst of grey clouds, **BIONIC-FINISH® ECO**'s innovative dendrimer technology offers unmatched protection from the pouring rain. An invisible shield that surrounds you, water-repellent and sustainable.

ECO-Empowerment: Sustainable, Efficient, and Versatile

Non-fluorinated, sustainable and certified solutions for permanent high-performance water repellents

Sustainable Solution

Highly efficient performance with very low application quantities, therefore no impairment of haptics and appearance

Low Application Quantities

Suitable for demanding technical and outdoor applications as well as for leisure and fashion clothing

Versatile Areas of Application
